

**Launch your Org in record time with fusionSpan's Trade Org Accelerator!** Get all the core functionality you need in a Salesforce implementation for your Trade Organization.

Are you looking to raise the stakes on your Salesforce implementation? Are you looking to get up and running quickly and with an affordable solution? Are you looking for features and functionality that serves your needs today, and will grow with your business long term? Then the Trade Org Accelerator is for you!

### Affiliations

Easily track multiple affiliations, roles, and relationships. Whether it's the relationship between account and contact, contact with multiple accounts, and contacts to contacts.

### New User Registration

New members define their accounts at the time of registration. Simplifies new user registration by checking for duplicates, identifying banned domains, validating email with reCAPTCHA, and setting passwords.

### Employee Roster

Achieve greater flexibility to display any data in Salesforce on the portal. Leverage this accelerate to deliver a variety of business functions on the customer portal including Employee Roster Management, CEU Tracking, Disclosures or Conflict of Interest, Engagement Scoring and more.

### Membership Power Pack (MPP)

Fonteva administrators can now tailor the dues renewal process. MPP provides granular control on when customers can renew, who can view the invoices, and pay online.

## Why use an Accelerator?

- Accelerator code is prebuilt and well-tested. It prevents the need to code from scratch and is easily extensible.
- Setting up an Accelerator has a lower (one-time) cost compared to the time it would take to build the feature from scratch.
- It is owned by the customer just like any configuration and has been successfully implemented for customers in the past.
- A fusionSpan Accelerator brings a set of features that customers can take advantage of quickly.
- fusionSpan will warranty the Accelerator for one year, provided no changes are made to the Accelerator code.
- All support questions for Accelerators can be submitted to Fonteva support.
